

## Electricity Supply Mix

Under Ontario Regulation 416/99, Bluewater Power Distribution Corporation is required to disclose the system-wide electricity supply mix to all standard supply service customers in its service area. The electricity supply mix is the combination of electricity sources used to generate the electricity that is consumed in Ontario.

The Ministry of Energy has provided a chart showing the electricity supply mix for 2016 for electricity suppliers. For details, please refer to the other side of this bill insert.

For further information please visit the Ontario Energy Board website at [www.oeb.ca](http://www.oeb.ca)

## Electricity Supply Mix

### Electricity Source

### Ontario's Electricity Mix 2016\*

Water Power	23.3%
Alternative (Solar 2.2%, Wind 6.8%, Biomass 0.5%, Waste 0%)	9.5%
Nuclear Energy	58.5%
Natural Gas**	8.2%
Other	0.4%

\*Includes both Tx (Direct) and Dx (embedded) connected generation (Ontario Ministry of Energy)

\*\*Includes dual-fueled facilities that are predominantly natural gas (e.g., Lennox Generating Station)

Note: Figures may not add to 100% due to rounding.
